JAPANESE LESSON

Songvocab Gurenge

紅蓮華 — Gurenge

Vocabulary List (inspired by LiSA's song)

A themed vocabulary set, not a lyric translation — see note below

This is a **vocabulary-only** lesson (rule L7's songvocab: format) — since Gurenge is a commercially copyrighted song, no lyric lines, phrasing, or sequence are reproduced anywhere here, in Japanese, romaji, or English. What follows is a standalone set of thematically-relevant words, translated and glossed independently, grouped by part of speech. Words that only appeared in the bracketed/parenthetical lines you flagged were left out entirely, matching your instruction.

Why no example sentences from the song? Per rule L7's songvocab: format, any usage examples for these words would need to be original sentences written for the lesson, not quotes from Gurenge itself — reproducing even short phrases in their original sequence would cross back into reproducing the copyrighted lyrics. If you'd like, a follow-up lesson could add original example sentences per word using this same vocabulary set.
