Project Support Files Cheat Sheet

Sidebar

AI · Project Support Files Cheat Sheet

What each support file and folder in the learning-blog project is for, and who maintains it. Summarised from `CLAUDE.md`, `rules/permanent_rules.md` and the files themselves. Paths are relative to the `website-content` folder.

LOADED AUTOMATICALLY

`CLAUDE.md`	The project guide: the routing table of which rule file to read, key paths and PDF commands.
`rules/permanent_rules.md`	Core rules P1, P2, P4-P7, P11, P12, plus an index of where every other rule lives.
`~/.claude/CLAUDE.md`	Your global instructions across every project: explanation style, prompting feedback, the utilities folder, the `conversation` prompt.
`~/.claude/projects/../memory/MEMORY.md`	Claude's index of saved notes about you and the project. The notes themselves are separate small files.

RULE FILES, READ ON DEMAND

`rules/prompt_rules.md`	Course prompt behaviour: outlines, errors and the streak. Authoritative.
`rules/workflows.md`	`progress`, `flesh out`, Q&A capture, agent questions, Korean history questions.
`rules/language_rules.md`	Language lessons, profiles, accents, storage, verb deep dives (L1-L6).
`rules/language_courses.md`	Songs, Basic Conversation courses and script courses (L7-L9).
`rules/language_syllabus.md`	Level definitions, syllabus checklists and the grammar track.
`rules/language_topic.md`	Language-neutral chapter lists for each Basic Conversation course.
`rules/kanji_rules.md`	Kanji pages (K1-K4).
`rules/programming_lesson_rules.md`	Python and other programming lessons and exercise chapters.
`rules/sidebar_rules.md`	Sidebar lessons, cheat sheets, Links and My Tools.
`rules/cheat_sheet_series.md`	Numbered series for cheat-sheet batch prompts.

COURSE TRACKING

`rules/course_prompts.md`	Which prompts are ready to type, with a Status each. Claude keeps it current; finished courses move to Completed Courses.
`rules/course_folder_mapping.md`	Prefix to folder. Claude adds a row when an outline is approved. Large: searched, never read whole.
`rules/course_name_index.md`	Flat list of prefix to full name for older courses. Read only; not edited.
`rules/suggested_topics.md`	Your own file of topic ideas. Claude never edits it.
`rules/pending_pdfs.md`	Courses that are finished but have no combined PDF yet.
`archive/`	Frozen: completed-course indexes and the old bucket list. Read only if you ask.

LOGS THAT GROW

`sidebar-pages.md`	One entry per Sidebar page. Append or edit one entry; never read in full.
`website_checks.md`	Things Claude wants you to look at. Tick items off when done.
`faqs/qa_with_claude.md`	Questions and answers saved with `add this to q&a`.
`faqs/agent_questions.md`	Agent and subagent questions, appended automatically.
`faqs/korean_history_notes.md`	Sourced notes from `korean history question`.
`project_issues.md`	Open questions for the personal multi-technology projects (PJ1-PJ3).

REPORTS AND SAVED SESSIONS

`progress-reports/`	`progress_YYYY-MM-DD_HHMMSS.txt` from each `progress` prompt.
`conversations/`	`conversation-YYYY-MM-DD_HHMMSS.md` from each `conversation` prompt.
`rules_review_2026-10-09.md`	The tidy-up review of rules and support files.
`questions_for_the_dumb_ape_man.md`	Decisions from that review that were left to you, each with a default already in effect.

INPUTS

`Links.md`	Your own raw link collection. Claude reads it for `/links` and never edits it.
`my-tools/<name>.yaml`	The spec for each My Tools page.
`rules/examples/`	Canonical lesson files Claude copies the structure from.
`styles/ and styles/courses/`	Genre and per-course stylesheets, linked as `/styles/...`. Not under `content/`; a site rebuild publishes changes.

CODE AND GENERATED OUTPUT

`content/`	Every course, lesson and sidebar page. The site publishes every `.html` here.
`scripts/python/`	PDF builders, `new_course_style.py`, `consolidate_styles.py`.
`projects/<name>/`	Project source code, never under `content/`.
`.gitignore`	Keeps `*.pdf`, `*.zip` and `*_print.html` out of git.
`rules.zip`	An older zipped copy of the rules folder (git-ignored). The live rules are in `rules/`.

SKILLS (.CLAUDE/SKILLS/)

`/course-chapter`	A course outline or chapter from a prompt like `react1-3`.
`/language-lesson /verb-deep-dive`	A language lesson, or a single-verb deep dive, with PDF.
`/new-kanji`	A kanji page, tile and badge.
`/links /my-tools`	Links chapters and interactive tools.
`/progress /restart`	The progress report; the session wrap-up.
`/rewrite /fix-names`	Update or rename files in the `html-rewrite` staging folder.

WHO EDITS WHAT

`Claude maintains`	`course_prompts.md`, `course_folder_mapping.md`, `sidebar-pages.md`, the three `faqs/` files, progress reports, memory.
`You own`	`suggested_topics.md`, `Links.md` and the `my-tools/` specs.
`Frozen`	`archive/`.
`Rule IDs`	Stable (P1-P13, PL1-3, L1-L9, K1-K4, SB/LN/MT). P14 and P15 are retired.

SNAPSHOT

Snapshot of the rule files as at 2026-11-08, summarised by reading them. Nothing was run to test it. If this sheet and a rule file ever disagree, the rule file wins, and the sheet needs regenerating. A few scratch folders are not listed.
